# Mohammad Rijwan Khan

LEAD & SENIOR FLUTTER DEVELOPER

mohammad.rijwan@gmail.com +91 8878519593 Gwalior, Madhya Pradesh, India

linkedin.com/in/mohammad-rijwan-khan-khan github.com/MohammadRijwan

## Professional Summary

Results-driven **Lead & Senior Mobile Application Engineer** with **8+ years of experience** in software development, specializing in **6.5+ years of Flutter & Dart** ecosystem expertise. Proven track record of architecting, developing, and deploying high-performance cross-platform applications (iOS/Android) for global clients. Expert in clean architecture, advanced state management (Bloc, Riverpod), AI/ML integration (Gemini, TensorFlow, ML Kit), and offline-first databases. Strong technical leader experienced in mentoring agile teams, optimizing memory footprint, and establishing CI/CD pipelines to accelerate delivery cycles.

## Core Expertise & Technical Skills

**Frameworks & Languages**

Flutter, Dart, Kotlin, Java, Android SDK, SQL

**Architecture & State**

Clean Architecture, MVVM, SOLID Principles, Riverpod, Bloc (Cubit), Provider, GetX

**Data & Cloud Services**

Firebase RTDB, PostgreSQL, Isar DB, ObjectBox, SQLite, Firebase Auth/Cloud, AWS Services

**Advanced Integrations**

Gemini AI / LLMs, TensorFlow Lite, ML Kit & Vision, OpenCV, BLE / IoT, MUX Video API, Stripe, GPay, Apple Pay

## Professional Experience

### Lead Flutter Developer @ VVT Solution Pvt Ltd

Nov 2023 – Present

- **Team Leadership & Architecture:** Spearhead cross-platform application design and development utilizing Flutter and Dart. Lead sprint planning, architectural design reviews, and establish code quality guidelines for the team.
- **AI Integration:** Designed and implemented an AI-Powered Intelligent Essay Grading System using natural language processing (NLP) algorithms and Google Gemini API, cutting manual evaluation time by 85%.
- **Scalability & Optimization:** Scaled backend service layer integrations (Firebase, AWS, and custom microservices) to support an Enterprise-Level Test Prep Platform with 100,000+ active users.
- **Offline Capability:** Built the *TopAll AI NEET/JEE Prep App*, achieving 99.9% crash-free sessions. Implemented offline caching via Isar DB, accelerating app startup and resource loading by 40%.
- **Mentorship:** Mentor a team of 4 junior and mid-level developers, conducting code reviews and onboarding sessions.

### Senior Flutter Developer @ Brainium Information Technologies

Jun 2022 – Oct 2023

- **UI Engineering:** Translated high-fidelity designs from Figma/Adobe XD into pixel-perfect, modular, and reusable Flutter widgets.
- **Video Streaming:** Led end-to-end engineering of a live video streaming application utilizing the MUX API, incorporating customized video buffering and data saving algorithms.
- **Payments & Monetization:** Integrated Google Pay, Apple Pay, and In-App Purchase (IAP) architectures, helping boost booking conversion rate by 18%.
- **Architecture Standard:** Championed the transition from ad-hoc MVC state management to Clean Architecture combined with MVVM and Provider patterns across three core company products.

### Flutter Development Specialist @ Invizzo Cloud Network

Nov 2021 – Aug 2022

- **Project Management:** Architected and delivered 5 high-impact customer applications from scratch, taking complete ownership of 2 key projects.
- **E-Commerce System:** Built Conaxo Business, a state-of-the-art e-commerce solution with dynamic layout configurations, virtual/physical items support, and high-performance list search.
- **State Management:** Implemented Riverpod state management to handle complex user carts, local caching, and real-time checkout flows.
- **Deployment:** Successfully automated app builds and published multiple releases directly to the App Store and Google Play Store.

### Flutter Developer @ Shree Sai Information

Dec 2019 – Oct 2021

- **Medical & IoT Ecosystem:** Engineered a multi-role Medical Device & Patient Management System connecting Patients (via mobile app for consultations and implanted device control) with Physicians & Manufacturers (via tablet portal to monitor device telemetry, expirations, and hospital allocations under HIPAA guidelines).
- **Custom Plugins:** Built native plugins using MethodChannels in Kotlin and Swift to interface with low-level background sync libraries.
- **Real-time Systems:** Configured WebSockets and Firebase Realtime Database to push live seat availability and validation updates on ticket booking platforms.

### Software Engineer (Android & Java) @ Nexus Software Solutions

Jan 2018 – Nov 2019

- **Native Development:** Designed and developed native Android applications utilizing Java, Android SDK, and SQLite databases.
- **Modernization:** Successfully migrated legacy modules to Kotlin and implemented clean MVVM patterns, resulting in a 15% reduction in size and 25% fewer crashes.
- **Integrations:** Integrated Google Maps API, real-time location tracking services, and Retrofit client for robust REST API integrations.

## Key Projects Showcase

### AI-Powered Intelligent Essay Grading System

An innovative AI-driven evaluation app leveraging natural language processing (NLP) and machine learning algorithms (Gemini APIs) to automatically grade written essays. Eliminates grading bias and offers instant analytical feedback to students.

### TopAll AI – Test Prep App

Online test prep ecosystem serving over 100,000 NEET/JEE aspirants. Includes fast-loading custom mock test interfaces, detailed visual analytics, predictive grading, and automated question paper generation under high concurrent loads.

### VVT Coaching – Test Prep Platform

Enterprise-grade coaching and test preparation ecosystem designed for large educational institutes. Features advanced test generation algorithms and machine learning models for predictive performance analysis.

### IoT-Enabled Medical Device & Patient Management System

Multi-role mobile and tablet ecosystem for managing implanted devices. Patient mobile app tracks device health, handles device operations, and facilitates secure physician consulting. Tablet app enables doctors and device manufacturers to track patient allocations, device expirations, and hospital distributions.

### Fantastix – Event Booking App

Enterprise-scale mobile ticketing and reservation application. Built with custom 2D canvas seat-selection layouts, real-time Firebase booking triggers, and Apple Pay/Google Pay checkout integrations.

### Conaxo Business E-Commerce

High-end e-commerce solution configured with Riverpod, supporting dynamic physical/virtual product inventories, localized checkout services, offline cart sync, and secure transactional layers.

## Education

**Master in Computer Application (MCA)** @ Rajiv Gandhi Proudyogiki Vishwavidyalaya 2011 – 2014

Bhopal, Madhya Pradesh, India

**Bachelor of Computer Application (BCA)** @ Jiwaji University 2008 – 2010

Gwalior, Madhya Pradesh, India

## Certifications

### SCJP – Sun Certified Java Programmer

Sun Microsystems / Oracle Corporation

### Flutter Developer Certification

TestDome | Credential Verify

## Languages

English (Fluent), Hindi (Native), Urdu (Native)
